Education

KLE Technological University

MS (Engg) by Research	2023-present
B.E. in Electronics and Communication	2018-2022

ICS Mahesh PU College

Pre-University	2016-2018

Academic Positions

KLE Technological University

Undergraduate Researcher	2021-2022
(Advised by Uma Mudenagudi, Ramesh Ashok Tabib)	
Undergraduate Researcher	2020-2021
(Advised by Ujwala Patil, Ramesh Ashok Tabib)	

Industry Experience

Research Assistant, **CEVI-KLETech.**	2022-present
Computer Vision Researcher (Internship), **CEVI-KLETech.**	Jan-May 2022
Hardware Design Engineer (Internship), **Eartkey Pvt. Ltd.,**	Aug 2020-Mar 2021

Professional Activity

Reviewing

AI for Visual Arts Workshop and Challenges *@ ECCV*	2024
Out-of-Distribution Generalisation in Computer Vision Foundation Models *@ ECCV*	2024
Geometry-grounded Representation Learning and Generative Modelling *@ ICML*	2024
IEEE Transactions on Image Processing	2024
Women in Computer Vision *@ IEEE/CVF CVPR*	2024
Women in Computer Vision *@ IEEE/CVF ICCV*	2023

Program Volunteer

3D Vision Summer School, IIIT Bangalore	2024

Program Participant

3D Vision Summer School, CVIT-IIIT	2022, 2023

Conferences Attended

The 9th National Conference on Computer Vision, Pattern Recognition, Image Processing, and Graphics (NCVPRIPG) @ IIST, Thiruvananthapuram	2024

Teaching and Mentorship

Teaching Assistant

AICTE ATAL Faculty Development Program (FDP), KLETech.	2023
(Python, HandsOn Computer Vision and Machine Learning)	
Summer School on Visual Intelligence, CEVI-KLETech.	2022,2023

Mentorship

Summer School on Visual Intelligence, CEVI-KLETech.	2021,2022,2023

Publications

Conferences

Technical Skills

Programming Languages: Python, C, C++, Java, MATLAB, C#, JavaScript
Frameworks: HTML, CSS3
Libraries: PyTorch, Tensorflow, Pandas, Numpy, Matplotlib, Sklearn, Scipy
Dev Tools: VSCode, Spyder, Jupyter, Git, GitHub, GIMP, Blender, Android Studio, Docker
OS: Linux, MacOS, Windows
Embedded Systems: Raspberry Pi, Arduino, 8051, ARM Cortex

Projects and Research

1. **"AI-Driven Human Digitization and Scene Reconstruction for Enhanced Game Asset Generation"** *(SERB – INAE Online and Digital Gaming Research Initiative)*

   In my latest project, under the guidance of Prof. Uma Mudenagudi, I am exploring the digitization of human NPCs (Non-Player Characters) and PCs (Player Characters) for video games. This involves advanced techniques in object and scene reconstruction and generation, aimed at creating high-quality game assets. I am also integrating AI into game asset generation to enhance the realism and interactivity of game environments. The goal is to improve game development by providing more realistic and detailed characters and environments, thereby enhancing the overall gaming experience.

2. **"Multispectral Image Analysis Towards Precision Agriculture"**

   During my undergraduate program, I worked with Prof. Ujwala Patil on multispectral image analysis pipeline for precision agriculture. My work focused on processing spectral images to assess crop and soil health. I developed libraries for integrating spectral cameras and preprocessing captured data.

3. **"Image Restoration and Enhancement",** *(Dept. of Science and Technology-Digital Poompuhar)*

   In my academic pursuits, I focused on low-light image enhancement under the guidance of **Prof. Uma Mudenagudi.** I published ***"LightNet: Generative Model for Enhancement of Low-Light Images."*** to improve image quality in challenging low-light conditions and also achieved 13th rank in the ***NTIRE 2022 Challenge at CVPR,*** sharing valuable insights with the research community. Additionally, my research interests extend to image denoising, restoration, and enhancement. My recent research paper, ***"HNN: Hierarchical Noise-Deinterlace Net Towards Image Denoising,"*** published in the CVPR 2024 workshop, addresses advanced techniques in image denoising. This paper introduces a hierarchical approach denoise images, contributing to the broader field of image restoration. Notably, HNN can be extended from image denoising to other image restoration tasks such as image dehazing, shadow removal, and image deblurring. These extensions are detailed in the challenge reports titled ***"NTIRE 2024 Image Shadow Removal Challenge Report"*** and ***"NTIRE 2024 Dense and Non-Homogeneous Dehazing Challenge Report",*** where we achieved notable 11th and 9th ranks (globally) respectively.

4. **"Image Annotation QC Tool"**

   In collaboration with the **CEVI-SEED (Student Ecosystem for Engineered Data) Lab**, this tool has been meticulously **developed to assess the quality of annotated images**. Leveraging the expertise of the lab, the tool serves as a valuable resource for evaluating the precision and accuracy of image annotations in diverse applications.
